

Administrivia

Slide 1

- “Sample programs” page updated with some example shell scripts. Notice also the “useful links” page.
- Homework 3 on Web; due next Wednesday. Homework 4 also on Web; due next Monday. (Homework 4 should be easy.)
- Class mailing list — everyone got a test message last Friday, right? (No replies so far!) Archives linked from class Web page.

Shell Script Examples

Slide 2

- (We’ll write these in class.)
- Script to rename all `.htm` files to `.html` (or something similar). `basename` may be helpful.
- Script with a recursive function to compute factorial.

Minute Essay

- Tell me something you've learned from this class so far that was useful and/or interesting.
