

Slide 1

Administrivia

- Homework 8 due today.
- Information about projects on Web. Proposals due April 17. Projects due May 5.

Slide 2

“Programming” Problems

- How many ways can we think of to do a “mass rename” of files? e.g., rename all `.cc` files to `.cpp`?
- How many of them work (i.e., don't produce “bad” error messages) if there are no `.cc` files? How can we fix this ones that don't?
- How many of them work if some of the file names contain blanks? How can we fix the ones that don't?
- *(Solutions from class coming soon.)*

“Programming” Problems, Continued

- How many ways can we think of to find “broken” (or “stale”) symbolic links?
- *(Solutions from class coming soon.)*
