

Administrivia

- Reminder: Homework 2 due today.
- Readings list for shell scripting tweaked a bit. That “advanced scripting guide” is full of good information but long, and, well, advanced. The GNU manual is less intimidating (relatively!).
- Homework 3 on the Web. Due next Wednesday. Notice that this is a “programming assignment” so you will turn in your work by e-mail.

Minute Essay From Last Lecture

- (Everybody seemed happy with the pace. Good!)

Slide 2

Shell Scripting — Examples

Slide 3

- Script to find and print names of machines in Linux.
- Script with improved version of factorial function.
- Script to change file name to all-lower-case (contrived).
- Script to rename files (in particular to change one suffix to another).
- Script to find broken links.
- My "mail files" script, linked from "sample programs" page.
