### Administrivia

- After I finish grading Homework 2, I will mail you an average so far, including an attendance/participation score. Final grades will be based on:
  - Class attendance/participation (50 points).
  - Homework (50 points).
  - Project (100 points).
- Remember that everything for the project is due May 10. I will be out of town part of next week. E-mail and/or voice mail if you have questions.  
A short status report on the project is due today by 5pm.

Slide 2

### What I Hope You Learned

- Basics ideas of hardware, software for parallel programming.
- PAD-I-level programming skills in three widely-used parallel programming environments (MPI, OpenMP, C). (Also a bit about how to install software as a non-root user.)
- Basics of how to “think parallel” — generic discussion, plus several examples in some detail:
  - Numerical integration.
  - Molecular dynamics.
  - Heat diffusion.

## Minute Essay

- None — sign in.
