Show Your Code

3/20/2009

Opening Discussion

- Minute Essay comments
    - Adding code in Excel, ease of doing so.
    - We won't be doing anyone's project in class.
    - If we write our table back out to CSV, it will only have the numbers in the table. The code won't go across.

Show Your Code

- Let's look at people's code to the various options.

Improved File Handling

- At the end of last class we talked about a few changes we could make in how we deal with files.

- Today I want to actually write them.

  - Make readFile() take an argument of the file name.

  - Create a writeFile() that uses a PrintWriter to output a CSV file.

Minute Essay

- What do you find to be most challenging about the material we have covered so far in this class? What things do you still get hung up on?
