Course Conclusion

12-6-2010

Opening Discussion

- Minute essay comments:
  - Public and Java.
  - Is OO going out of style?
  - Is imperative programming going out of style?

Finishing Vect

- I'd like to real quickly put some operations in our Vect class.

- Give some of them symbolic method names.

What We Have Done?

- Basic programming logic and problem solving.

  - Statements, conditionals, loops, recursion.

- Functions and functional style.

- Files for accessing data. XML to give it meaning.

- GUIs and Graphics.

- Goal was to make you think and the get you thinking about things in new ways.

Course Evaluations

- Now we are going to do course evaluations.

- They are electronic so you will do them on your browser.

- Please be informative and provide constructive criticism. Hopefully you have seen that I do utilize student input for this course. That includes these forms.

- You were the guinea pigs for Scala. I know some things that need to improve, but could use your input as well.

Minute Essay

- What times can you NOT do a review session?
