Finishing Recursion

11-28-2011

Opening Discussion

- Minute essay comments:
    - Nothing crazy happened to me over the break.
    - Taking PoP II after a break.
    - What is my favorite holiday?
    - Consider looking back at older assignments to see how far you have come.
    - Final is like the midterm with a cheat sheet. Also get APIs.
    - I didn't go far over the weekend.
    - Programming is extremely fun!!!

More

- A for loop can only easily go in place of recursion that calls itself once.

- IcP solutions.

Mazes

- My favorite example is mazes.

- Consider a maze as a 2-D grid with each square either filled or not.

- Now the challenge is to find the length of the shortest path through the maze.

- How do you do that?

Minute Essay

- What questions do you have about stuff?
