# **Opening Discussion**

Do you have any questions about the assignment?

Let's do the stuff that you requested on your minute essays last time.

### **Course Recap**

- We looked at a number of different topics in this course.
  - Object-orientation and how it is done in Java.
  - Inclusion polymorphism.
  - Immutability and how it helps in SE.
  - Arrays and the processing of them.
  - Basic data structures
    - Stacks, queues, linked lists, priority queues, binary trees, heaps.
  - Recursion and using it to solve problems.

### **Details of Java**

- You also learned about how to do some different tasks in Java with the Java API.
  - GUI building and graphics
  - Exceptions for error handling
  - Threads
  - Streams
  - Networking
- Combined, these allow you to create interesting an powerful programs.

# **Course Objectives**

- More important than the material is if the course met its objectives.
  - Did this course make you think?
  - Has this course enabled you to think about things in new ways?
  - Do you feel you have a better understanding of the object model of computing and how to use it to solve problems?
- Are you motivated to do more? You know how to do interesting things in Java, find a pet project and practice your skills.

## Minute Essay

- We get to do the course evals now. I also want you to leave a minute essay saying when you would want a review session to be. I'll be sending out an e-mail letting you know when a review sheet will be up.
- I would like you to turn in assignment #8 by the Friday the 4th.
