

Course Conclusion

4-29-2011

Opening Discussion

- Minute essay comments:
 - There will be a review sheet for the final.
 - Will I do your last assignment?
 - Syntax errors lead to a grade of 20%. Runtime errors count off less.
 - Timeline for submissions.
 - Tron option for assignment #4.
 - Mercy?
 - Course name changed to PoP.

A Vect Class

- I'd like to real quickly write a class for a 3-D vector. We can call it Vect.
- It needs components and methods.
- Give some of the methods symbolic names.

What We Have Done?

- Basic programming logic and problem solving.
 - Statements, conditionals, loops, recursion.
- Functions and functional style.
- Files for accessing data. XML to give it meaning.
- GUIs and Graphics.
- Goal was to make you think and then get you thinking about things in new ways.

Course Evaluations

- Now we are going to do course evaluations.
- They are electronic so you will do them on your browser.
- Please be informative and provide constructive criticism. Hopefully you have seen that I do utilize student input for this course. That includes these forms.
- You are only the second semester using Scala. I know some things that need to improve, but could use your input as well.

Minute Essay

- What times can you NOT do a review session?
