

Detecting Overflow

- No overflow when adding a positive and a negative number
- No overflow when signs are the same for subtraction
- Overflow occurs when the value affects the sign:
 - overflow when adding two positives yields a negative
 - or, adding two negatives gives a positive
 - or, subtract a negative from a positive and get a negative
 - or, subtract a positive from a negative and get a positive
- Consider the operations $A + B$, and $A - B$
 - Can overflow occur if B is 0 ?
 - Can overflow occur if A is 0 ?
