

Slide 1

Administrivia

- Reminder: Homework 7 due next week.
Also, if you haven't turned in a final version of Homework 6 yet (and many have not), consider this a nudge?

Slide 2

Minute Essay From Last Lecture

- Students who said anything about their spring break: Most common was not doing much, maybe going home, getting some rest. But a few traveled: Taiwan (with the choir), Belgium, Cuba.
- Mine was relatively relaxing, and I got caught up with grading.

vim Tips, Revisited, Etc.

- If you copy and paste in code with comments, vim will put in extra indents. To make it do that, `:set paste` before the copy, `:set nopaste` after.
- Remember you can use `gg=G` to reindent the whole file.
- If you use starter or other code that includes comments, do remember to review and possibly edit them!

Slide 3

Recap of Video Lectures

- The C preprocessor: Feature most likely to be new and useful is macros. Remember that they're simple text substitution, not functions, so extra parentheses often highly advisable. (Is it clear why?)
- `make`.
- Questions?

Slide 4

Open Lab Time

- (Use remainder of class period to work on Homework 7.)
- (Or this might be a good time to set up a makefile, if you haven't.)

Slide 5

Minute Essay

- Does `make` make more sense to you after the more-in-depth discussion?
