

Slide 1

Administrivia

- Homework 2 on the Web. Due in a week.

Slide 2

Minute Essay From Last Lecture

- (Most people found what we did Friday at least somewhat similar to Matlab, though non-interactive and less capable.)

Example — “Making Change”, Continued

- Review problem statement: Given a number of pennies, show how to represent it with minimum number of coins (pennies, nickels, etc.).
- Last time we did an example on the board. Do another? and then think about a strategy for solving it using a C program and what we've talked about so far (variables, expressions, and simple I/O).
