Administrivia

- Reminder: Homework 6 due today.

  Clarification: Second problem says read "from standard input". That means "from the keyboard, or from redirected input" (as discussed 10/23). You can use `fgetc(stdin)` to read a character, or `getchar()`.

- (Review minute essay from last time.)

Slide 1

Sorting and Searching, Continued

- (Finish selection sort example from last time.)

- (Sketch sequential search, write code for binary search.)

Slide 2

Slide 3

Minute Essay

- None — quiz.
