Course description

This course introduces the fundamentals of operating systems design and implementation. Topics include the following.

- Role and purpose of operating systems.
- History of operating systems.
- Processes and process management, including a discussion of concurrency and related issues.
- Memory management.
- Input/output and device management.
- File systems.

Basic information

Class meeting times and location

- MWF 12:30pm – 1:20pm, HAS 340

Prerequisites

- CSCI 2321

Instructor and contact information

- Dr. Berna Massingill
- Office: HAS 201L
- Office phone: (210) 999-8138
- Web page: http://www.cs.trinity.edu/~bmassing/
- E-mail: bmassing@cs.trinity.edu
- Office hours:
  - Monday/Wednesday 3:30pm – 5:30pm in HAS 340
  - Tuesday/Thursday 2pm – 5pm in HAS 201L

In addition to these scheduled office hours, you are welcome to drop by and see if I am in my office and free to talk, or you can make an appointment by calling me or sending me e-mail. If I am not in my office during scheduled office hours, I should be somewhere in the building (perhaps in one of the labs helping another student), and there will usually be a note on my door saying where to find me.

- Open lab hours: Notice that some of my office hours will be in HAS 340. This is “open lab”, intended as a time when you can come work on your homework with someone available to help with any questions or problems.

Grading

Grades in this course will be determined by the results of two major exams (a midterm and a final), several homework assignments, and class participation, weighted as follows.

<table>
<thead>
<tr>
<th>Component</th>
<th>Maximum points</th>
</tr>
</thead>
<tbody>
<tr>
<td>Midterm exam</td>
<td>100</td>
</tr>
<tr>
<td>Final exam</td>
<td>200</td>
</tr>
<tr>
<td>Homework</td>
<td>about 300</td>
</tr>
<tr>
<td>Class participation</td>
<td>30</td>
</tr>
</tbody>
</table>

Numeric grades will be calculated as a simple percentage, by dividing total points earned on the above components by total points possible. These numeric grades will then be converted to letter grades based on a curve, but in no case will the resulting letter grades be worse than students would receive based on the following scheme.
<table>
<thead>
<tr>
<th>Numeric grade</th>
<th>Letter grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>90 – 100</td>
<td>A</td>
</tr>
<tr>
<td>80 – 89</td>
<td>B</td>
</tr>
<tr>
<td>70 – 79</td>
<td>C</td>
</tr>
<tr>
<td>60 – 69</td>
<td>D</td>
</tr>
<tr>
<td>0 – 59</td>
<td>F</td>
</tr>
</tbody>
</table>

**Exams**

Exams are comprehensive but will emphasize the most recent material. They are scheduled as follows. Please plan accordingly.

- Midterm: October 12, in class. *Changed to October 19, by agreement.*
- Final exam: December 13, 2pm.

**Homework assignments**

Several homework assignments will be required for successful completion of this course. Some will require programming; others will not. Detailed requirements will be provided as part of each assignment; due dates will be announced via the course Web page.

**Attendance**

Regular class attendance is strongly encouraged; class participation grades will be based largely on attendance.

**E-mail**

Course-related announcements will sometimes be made by sending e-mail to the Trinity e-mail addresses of all registered students. Students are strongly encouraged to read mail sent to their Trinity addresses frequently. An archive of such announcements will be provided via the course Web page.

**Late and missed work**

Exams can be made up only in cases of documented conflict with a university-sponsored activity, documented medical emergency, or conflict with a religious holiday.

Unless otherwise stated for a particular assignment, homework will be accepted up to one class period late, *but no more*, at a penalty of 10 percent off per working day. This penalty may be waived or additional time allowed *at the instructor’s discretion* in cases of illness or conflict with a university-sponsored activity or religious holiday.

If you have unusual circumstances (as we all sometimes do), please discuss these with the instructor as far in advance as possible.

**Collaboration and academic integrity**

Unless otherwise specified, all work submitted for a grade (homework assignments, quizzes, and exams) must represent the student’s own individual effort. For students covered by the Academic Honor Code, unless otherwise stated all submitted work (homework, quizzes, and exams) will be considered pledged work. Discussion of homework assignments among students is encouraged,
but not to the point where detailed answers are being written collectively. Graded papers and sample solutions from previous years (whether exams or homeworks) are off limits. Answers that are identical beyond coincidence (either to another student’s work or to a sample solution from a previous year) will be considered to be in violation of Trinity’s Academic Integrity Policy or Academic Honor Code, whichever applies, and will result in disciplinary action. You are responsible for the security of your work, both electronic and hard copy.
