

## Changing the File Name of Your Home Page

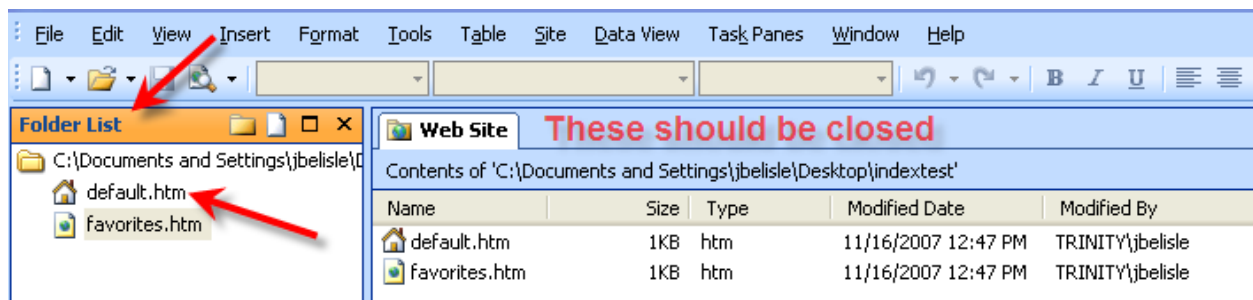

It's a good idea to know what your server "picks up" as the name of your homepage. "Index," "Default," and even "Home" are used by various service providers.

IMPORTANT: ALWAYS CHANGE THE HOMEPAGE FILE NAME THROUGH EXPRESSION WEB

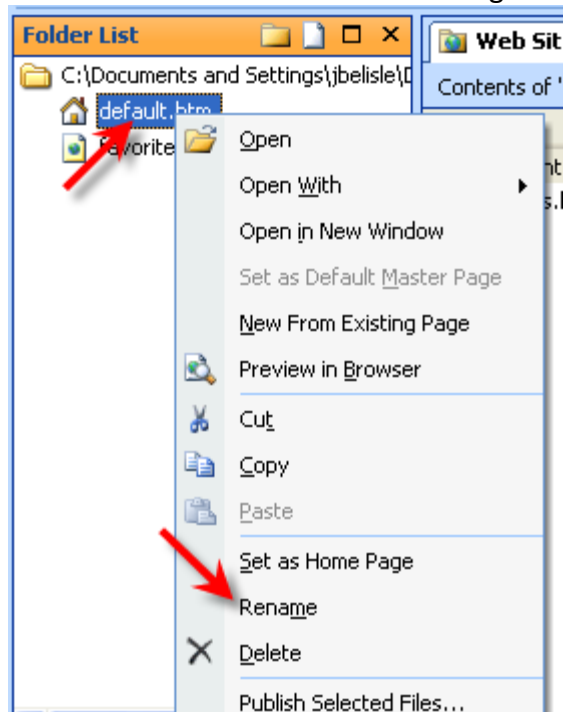

Open your site folder

Look at the list of your files in Expression Web in the Folder List Window

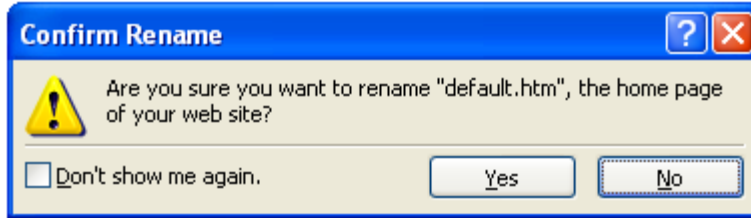

Find the file called **default.htm** and right-click on it – go to **Rename**

Change the name to **index.htm** – do not leave off the file extension

This confirmation comes up – check “yes”

The window comes up to update the hyperlinks – check Yes
