

Go to www.google.com and click more

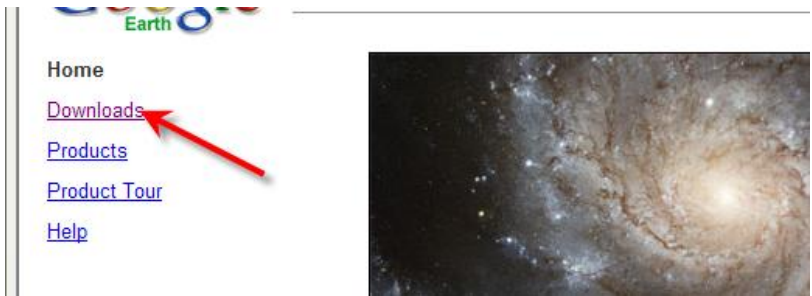

Click even more:

Open Google Earth:

Find the Downloads section on the left side of the page (do a product tour first if you wish):

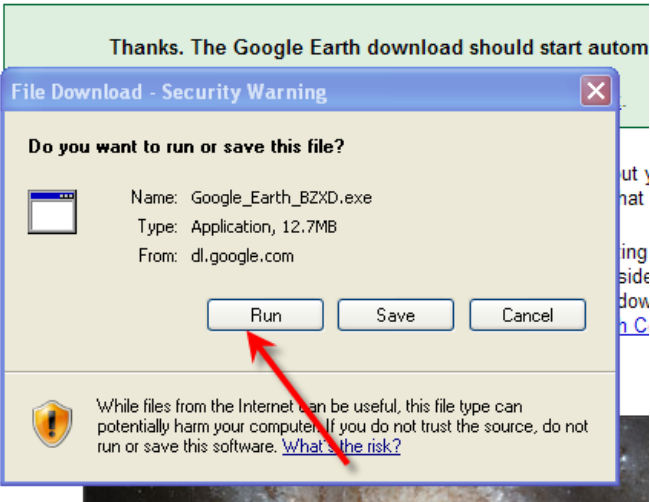

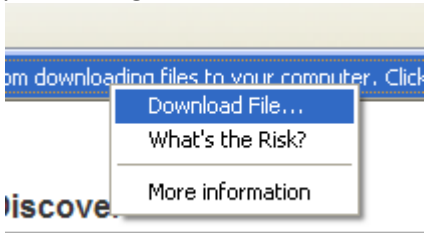

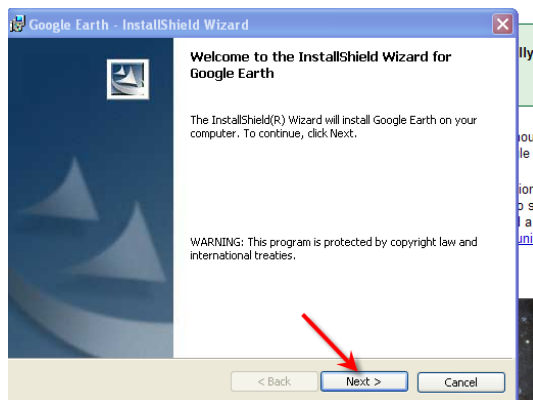

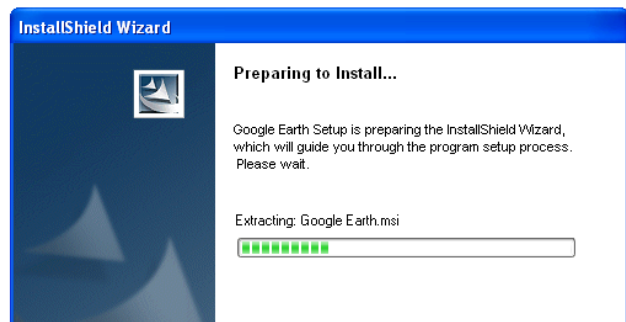

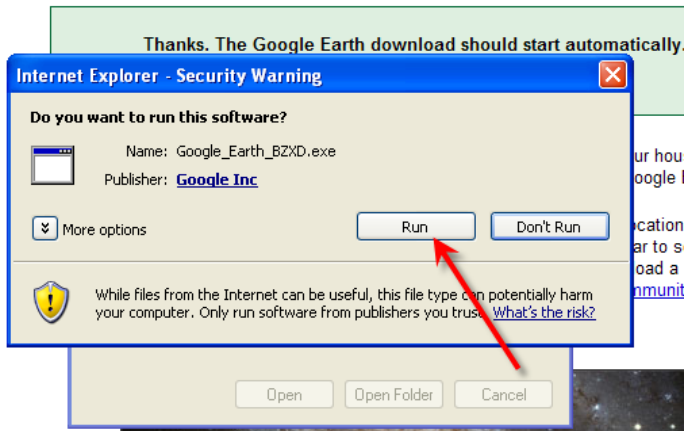

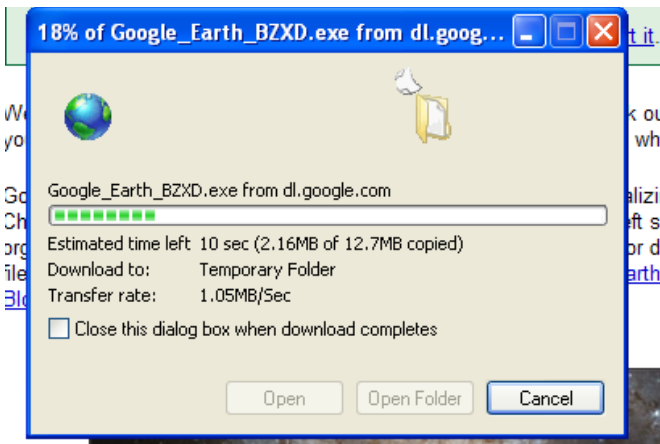

Read and agree, if you choose to continue download:

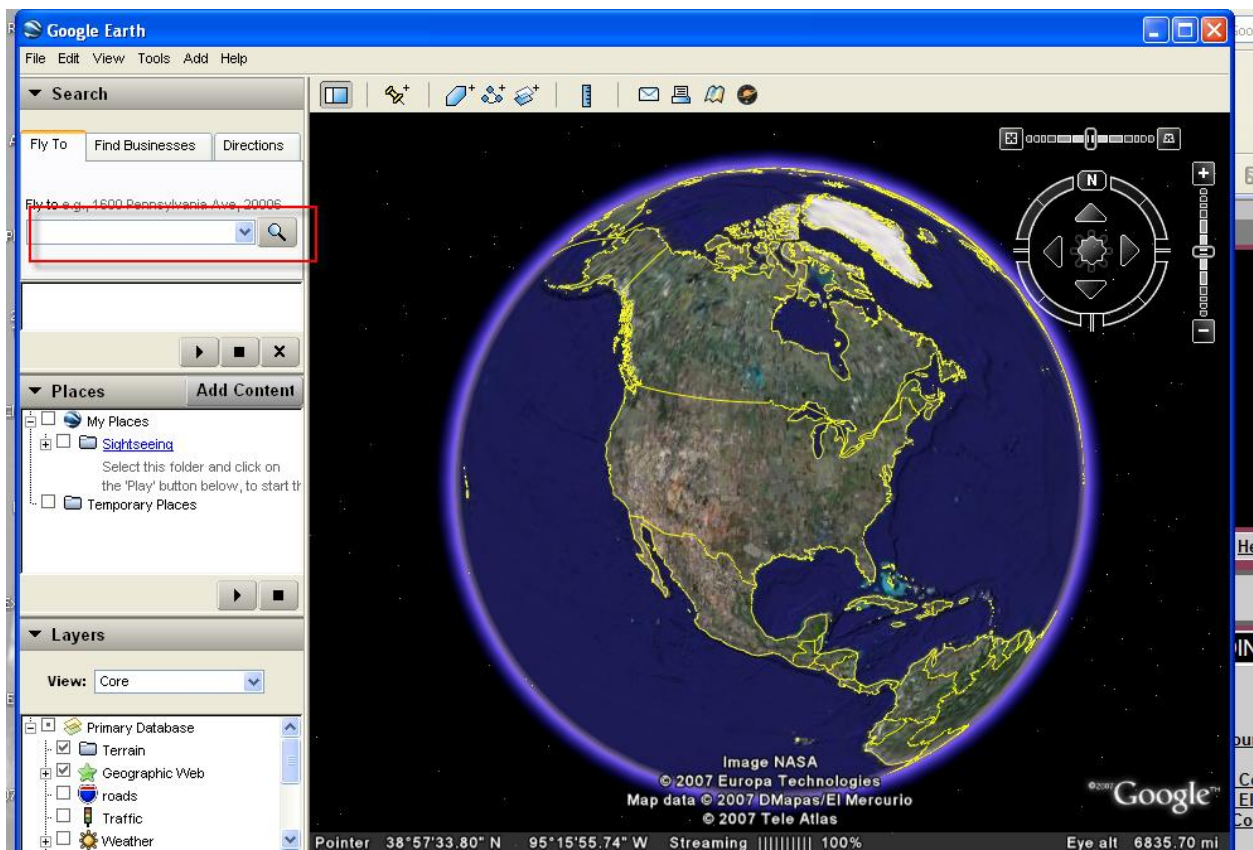

Download Google Earth 4.2 (beta) for PC, Mac

Follow directions for download. You may need to work with or adjust your popup blocker, depending on your settings.

Now you can fly to anywhere in the world.
