

Making Screen Captures in Vista

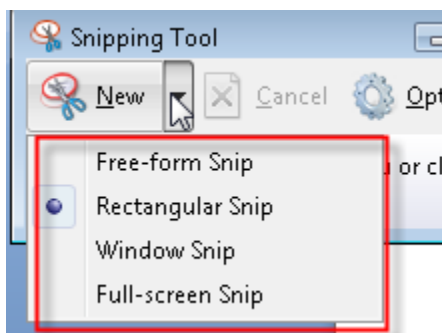

In the Search Window, type in "sn" – you will see Snipping Tool listed above:

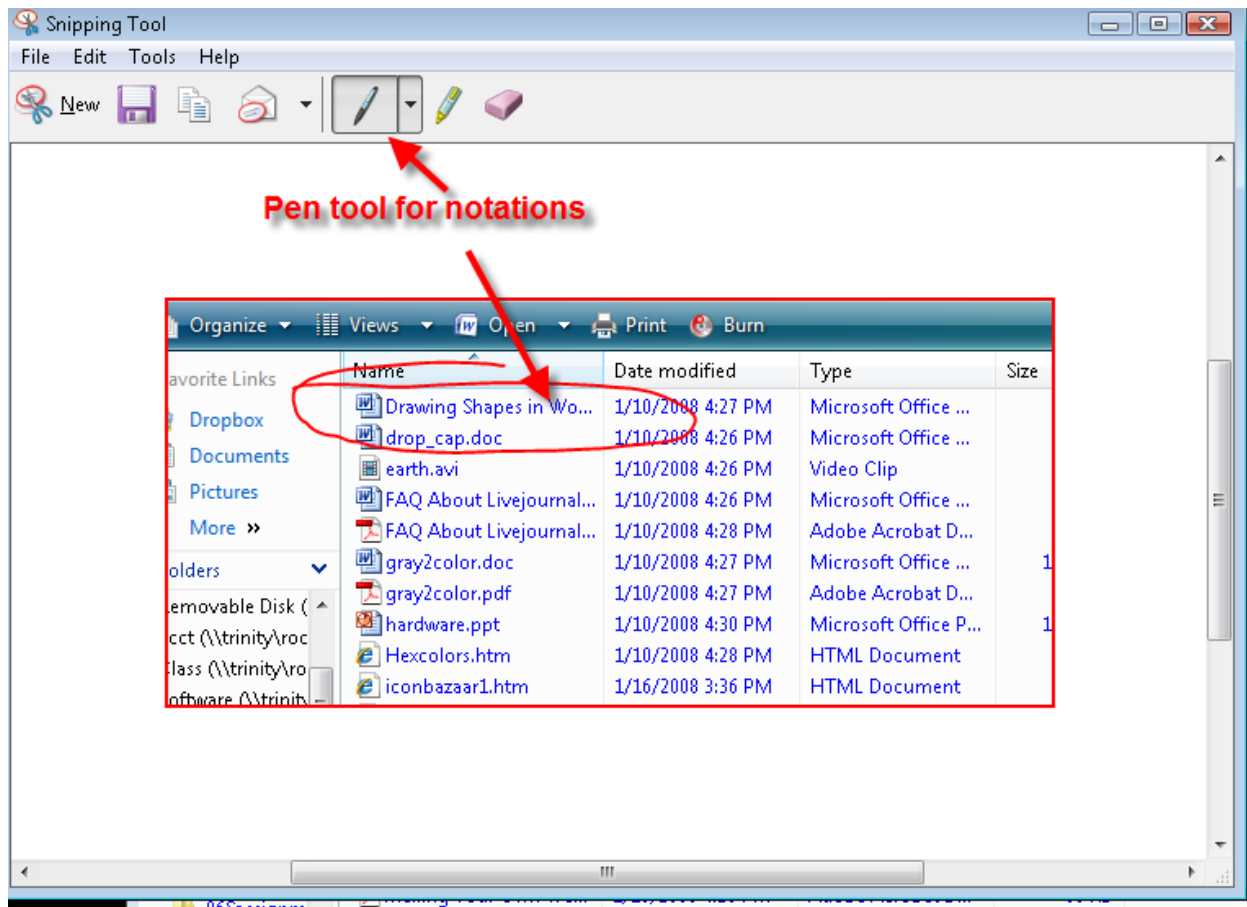

It will tell you to drag the cursor around what you want to capture:

It will also give you drop-down choices if you need a different shape or section:

A new window will open with a toolbar at the top:

When you finish, choose how/where you want to save the selection or where you want to send it:
