

## Scanning by Importing through Adobe Photoshop Elements Software:

Place the image face-down at the upper right corner of the scanner flatbed.

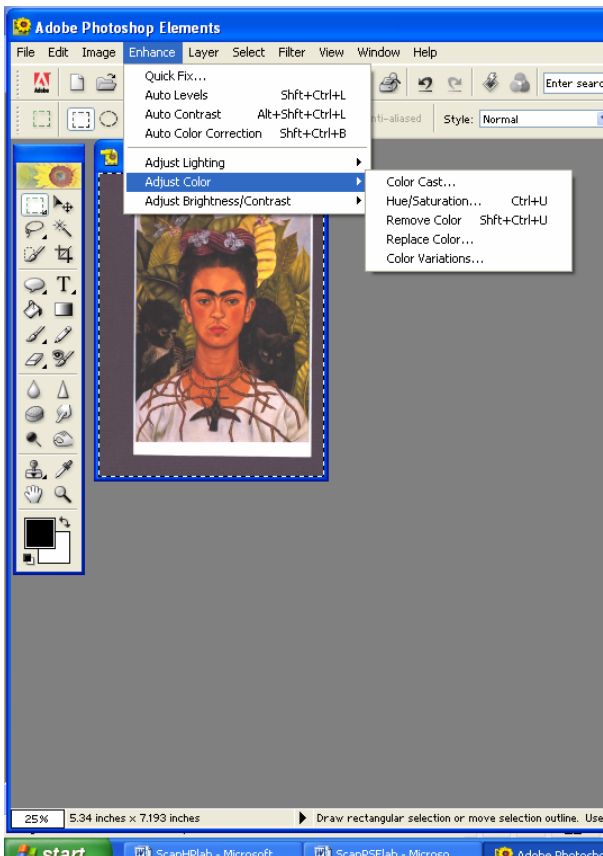

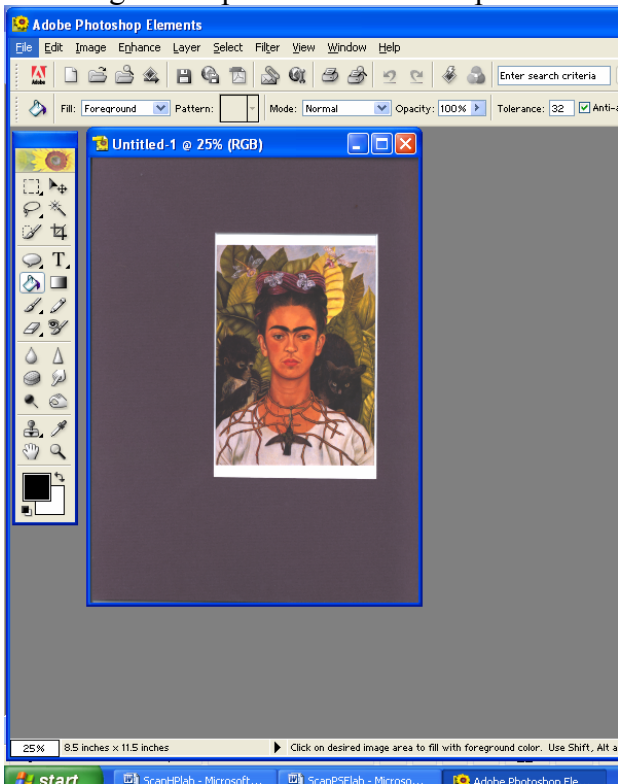

Programs>>Adobe Photoshop Elements>>Import>>HP PrecisionsScanPro

You will hear the scanner open the image and see the window below as the scan progresses.

The image will open in the Photoshop Elements window.

Use the Photoshop Elements crop or selection tool to select what part of scanned image you want to save.

Use any of the PSE tools to enhance the image.

You can then save it in any format available to PSE.

Or you can use the Save for Web Feature to save for use in a web page or a PowerPoint presentation.
