CS4285: Senior Software Project I
Report 2

Written Report
Due, September 22, 2003

Feasibility Reports

1. An Organizational Chart of All Participating User Areas, including their Hierarchial Relationships. You should include a list of interviewers and the persons being interviewed.

2. A Narrative Describing the User’s Background and Prior Experience with Computers.

3. Documentation of User Problems with the Existing System (manual or automated) and the Impact of these Problems.

5. A Tentative Statement of User Expectations.

6. Your System Specifications built upon User Expectations.

8. A Brief Summary of Canned Software or of Customized Software Available for this Application.
