Project Groups

It is necessary to do some restructuring of the groups used during the analysis and design phase of the project in CS 4285, Fall 2002. Some group members are doing Thesis projects and will not be available during the implementation phase. Groups 4 and 5 are being combined into a single group which will deal faculty applications (teaching and research). Finally, two changes in group leadership are required. These changes are not unlike the kind of staffing changes made by management in the middle of real-world software projects. Following are the group assignments we will be using during the implementation phase of this project:

1. Registrar
   - Leader, Suneal Jannapureddy
   - Andrew Leininger
   - Jermy Brady
   - Jason Meridth
   - Byron Ihegword

2. Information Technology
   - Leader, Jonah Mancini
   - Daniel Di Paolo
   - Nathaniel Lytle
   - Rajesh Daniels

3. Admissions
   - Leader, George Job
   - Steven Winston
   - Brian Flournoy
   - Lynn Tsai
   - John Kim

4. Faculty (Teaching and Research)
   - Leader, Amanda Beck
   - Allen Fouty
   - Jason Quilici
   - Robert Fleener
   - Jason Webster

5. Students
• Leader, Brian Holden,
• Bryan Heard
• David Hummel
• Shey Liggett
• Daron Shrode

6. Administration (Inventory Control)
• Leader, Yvonne Kuo
• Collin Le Maistre
• Jason Aguilar
• Joshua Bauman
• John Dillard

7. Administration (Physical Plant)
• Leader, Matthew Dillard
• Joseph Klesert
• Ronnie Sanders
• Monica Ortenzio

8. Control
• Leader, Jeffrey Watkins
• Brian Purdy
• William Von Rosenberg
• Christopher Titus

The ninth group will focus on coordination and interface of each project. Project groups are required to prepare and present a series of reports. Each report must be submitted in electronic form by e-mail to cs4285@cs.trinity.edu. The reports will not be assigned a letter grade, however, they will be read and occasionally the instructor will ask that a report be modified and re-submitted. The reports will be available for reading on the course web site.
