

Show Your Code

9-21-2010

Opening Discussion

- Minute essay comments
 - Can you use diagonals on the keypad?
 - Are the reactions to the keys arbitrary?
 - Is it possible to make the rocket smaller?
 - Can you get ideas from the Greenfoot gallery?
 - Can an actor change to something else once it reaches something?
 - Can we make the rocket explode?

More Comments

- How broad is the vocabulary that Java understands?
- How did Monique get her houses to move?

Show Your Code

- It is time for some lucky people to show us their code.

Switch Statements

- If is not the only conditional statement in Java. The switch statement allows you to pick between multiple options, but you can only select on an integer.
- The Wombat scenario uses switch statements.
- `switch(intExpression) {`
 - `case #:`
 - `break;`
- `}`

Playing with our Person

- Making the rocket pick up people.
- Associating different keys with multiple rockets.

Minute Essay

- Next week we will do loops. Is there anything you would like to see us start doing as an example?
- Remember that the second quiz is on Wednesday.
