

Wrapping up Priority Queues and Heaps

4-26-2002

Opening Discussion

- What did we talk about last class?
- Do you have any questions about the assignments? They are all due in less than a week. I should point out that in the end it will be better for you to turn in something even if it doesn't work perfectly than it would be to turn in nothing.
- Sorting question from last minute essay.

Code

- Today we are just going to look at the code for priority queues and if possible, for the heap sort as well.

Minute Essay

- Next class I will be doing an overview of the whole semester which will be followed by a review session for the final. As with my normal review sessions, I don't expect to prepare anything. However, if you want me to talk about something that I might not be able to do in a completely impromptu way let me know here.
