Group Evaluation

You should use this sheet to help evaluate your groups work on each specific part of the project. On it you will describe the work that you did on that portion of the project, then rate how well you thought the group did as a whole and how much you felt the other members of your group contributed to what was done.

How well do you feel your group did on this aspect of the project? What did you do well? What was lacking?

Describe the work that you did as part of the group?

Here you will evaluate the contributions of the members of your group including yourself. 1 is best and 5 is worst.
