11-10-2006
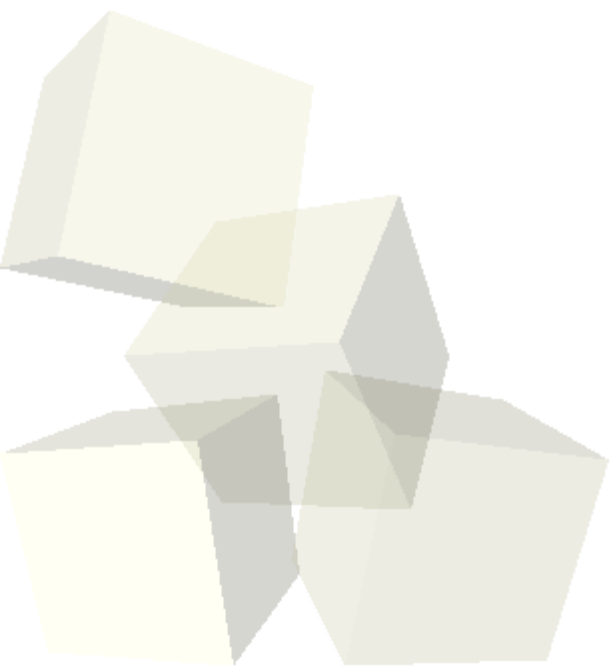

- What did we talk about last class?
- Was there anything that you found interesting in the reading?

- What are the various ways of dealing with other processes in Perl? When do you use each one of them?

- How do you tell Perl that you want to use a module?
- Where can you go to find different modules for your Perl install?
- Why should you consider using modules?

- I should get the description of assignment #8 up and it will be due on Monday.
