Multimodeling Examples

4-7-2005
Opening Discussion

- What did we talk about last class?
We can likely finish off our lid code today. There are bugs in what we wrote yesterday. I might normally skip doing this in class, but debugging is a very critical skill that I find is often lacking.
I want you, as a class, to develop some multimodels of the following systems. In approaching the multimodel consider refinements of elements of abstract models.

- Two jug system
- Boiling water
Minute Essay

- What will you do next Tuesday during this class time?
